wiUNIT TEST PLAN		Legend:	Passed (Result is same as expected)
Project Name:	FETCH: Inventory Management System with Predictive Analytics for Risha Pet Supplies		Failed (Actual result is NOT same as expected result)
Date:			In Progress (Test is still in progress or not yet done)
Project Manager:	Juan Carlo Reusora and Joylinda Jugan		Open (Not yet tested)
Run/Tested by:			
System version:	After the update of 11 October 2026 (test once that update is deployed)		

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
LOGIN MODULE								
	1 Completeness Check							
			1-01	Check if the Username field is empty	A tooltip "Please fill out this field." will be displayed			
			1-02	Check if the Password field is empty	A tooltip "Please fill out this field." will be displayed			
			1-03	Click "Forgot your password?", then check if the Username or email field is empty	A tooltip "Please fill out this field." will be displayed			
			1-04	Inside the Choose a new password page (reset link), check if the New password field is empty	A tooltip "Please fill out this field." will be displayed			
			1-05	Inside the Choose a new password page, check if the Confirm password field is empty	A tooltip "Please fill out this field." will be displayed			
	2 Format Check							
			2-01	Check if the user entered an incorrect username or password	A label "Invalid username or password" will be displayed			
			2-02	Inside the Choose a new password page, if the user enters a password with fewer than 6 characters	A label "Password must be at least 6 characters long" will be displayed			
			2-03	Inside the Choose a new password page, if the user enters a password without an uppercase letter	A label "Password must contain at least one uppercase letter (A–Z)" will be displayed			
			2-04	Inside the Choose a new password page, if the user enters a password without a lowercase letter	A label "Password must contain at least one lowercase letter (a–z)" will be displayed			
			2-05	Inside the Choose a new password page, if the user enters a password without a number	A label "Password must contain at least one number (0– 9)" will be displayed			
			2-06	Inside the Choose a new password page, if the user enters a password without a special character	A label "Password must contain at least one special character (e.g. !@#$%)" will be displayed			
			2-07	Inside the Choose a new password page, if the user enters a mismatched password in the Confirm password field	A label "Passwords do not match." will be displayed			
	3 Consistency Check							
			3-01	Check if the user credentials entered are correct	If the account role is "Administrator", "Manager" or "Viewer" the user will be directed to the Dashboard; if "Staff" to the Point of Sale; if "Supplier" to the Supplier Portal			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			3-02	Check if the show/hide password (eye) icon works when clicked	The password will be shown as plain text, then hidden again on the next click			
			3-03	Tick "Keep me signed in" and sign in, then close and reopen the browser	The user stays signed in. If it is unchecked, the session ends when the browser is closed			
			3-04	Click "Forgot your password?", enter a username or email, then click "Ask for a reset"	A label "If that account exists: an administrator account is emailed a reset link straight away. Any other account waits for an administrator to approve it, and is then emailed the link." will be displayed			
			3-05	Inside the Reset your password window, check if the Cancel button works when clicked	The window will close and the user returns to the Sign in form			
			3-06	Open an approved reset link, enter a valid new password and click "Save new password"	A label "Password has been reset. You can now sign in. Redirecting to sign in..." will be displayed and the user is directed to the Sign in page			
			3-07	Open the email confirmation link sent to a new account	A label "Email confirmed. You can now sign in to FETCH." will be displayed			
			3-08	Check if the "Back to sign in" link on the reset page works when clicked	The user will be directed to the Sign in page			
	4 Database Check							
			4-01	Check if the user signs in with an account whose email is not yet confirmed	A label "Please confirm your email address first. Check (masked email) for the confirmation link." will be displayed with a "Resend it" link			
			4-02	Check if the user signs in with a deactivated account	A label "Invalid username or password" will be displayed and access is refused			
			4-03	Check if the user opens a reset link that is expired or already used	A label "This reset link is invalid or has expired. Please request a new one." will be displayed			
	5 Range Check							
			5-01	Check if the user enters a wrong password 5 times within 15 minutes	A label "Too many login attempts. Try again in (seconds)s." will be displayed and sign-in is blocked for a few minutes			
ADMIN DASHBOARD (NAVIGATION)								
	6 Consistency Check							
			6-01	Check if the Dashboard menu works when clicked	The user will be redirected to the Dashboard module			
			6-02	Check if the Inventory menu works when clicked	The user will be redirected to the Inventory module			
			6-03	Check if the Sales History menu works when clicked	The user will be redirected to the Sales History module			
			6-04	Check if the Suppliers menu works when clicked	The user will be redirected to the Suppliers module			
			6-05	Check if the Reports menu works when clicked	The user will be redirected to the Reports module			
			6-06	Check if the Users menu works when clicked (Administrator only)	The user will be redirected to the Users module			
			6-07	Check if the profile name / Settings (gear) icon works when clicked	The user will be redirected to the Settings module			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			6-08	Check if the Notifications (bell) icon works when clicked	A notifications drop-down will open showing the latest alerts and the unread count badge			
			6-09	Check if the Theme toggle icon works when clicked	The interface will switch between light and dark mode			
			6-10	Check if the Collapse sidebar button works when clicked	The sidebar will collapse to icons only, and expand again on the next click			
			6-11	Press Ctrl/⌘ + J (or click "Jump to"), type a page, action or product name	The Jump to palette will open and show matching pages, sections, actions and products; pressing Enter opens the selected result			
			6-12	Check if the FETCH Assistant & Help button works when clicked	The assistant panel will open where the user can type a question and receive an answer			
			6-13	Check if the Logout icon works when clicked	The session will end and the user will be directed to the Sign in page			
DASHBOARD								
	7 Consistency Check							
			7-01	Check if the Total Products information is correct	The Total Products card will display the total number of products and how many are active			
			7-02	Check if the Total Revenue information is correct	The Total Revenue card will display the total sales amount and number of transactions (voided sales excluded)			
			7-03	Check if the Restock Needed information is correct	The Restock Needed card will display the number of products at or below their reorder level			
			7-04	Check if the Expiring Soon information is correct	The Expiring Soon card will display the number of products expiring within 30 days			
			7-05	Check if the Inventory Value information is correct	The Inventory Value card will display the retail value of all stock on hand			
			7-06	Check if the "Sales, last 30 days" chart is correct	The chart will display the daily sales totals for the last 30 days			
			7-07	Check if the "Stock by category" chart is correct	The chart will display the stock quantity per product category			
			7-08	Check if the Recent Sales list refreshes automatically	New sales will appear in the list within 10 seconds with the Live indicator shown			
			7-09	Check if the Needs restocking list is correct	The list will display the products that are low or out of stock			
			7-10	Click a card in the Expiring products panel (Within 30 days / In 31 to 60 days / In 61 to 90 days)	A window will open listing the products in that range with their expiry date and quantity			
			7-11	Inside the Purchase orders panel, check if the order status (advance) button works when clicked	A confirmation will appear, and the purchase order moves to its next status			
			7-12	Check if the Add Product button works when clicked	The user will be redirected to the Inventory module			
			7-13	Check if the "View all →" links work when clicked	The user will be redirected to Sales History (Recent Sales) or Suppliers (Purchase orders)			
			7-14	Check if the alerts chip works when clicked	The notifications drop-down will open			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			7-15	Check the status of a voided sale in the Recent Sales list	The sale is marked "Voided", not "Completed"			
INVENTORY MODULE								
	8 Completeness Check							
			8-01	Click the Add button, then check if the SKU field is empty	If the user clicks Save Product, a tooltip "Please fill out this field." will be displayed			
			8-02	Inside the Add New Product module, check if the Product Name field is empty	If the user clicks Save Product, a tooltip "Please fill out this field." will be displayed			
			8-03	Inside the Add New Product module, check if no Category is selected	If the user clicks Save Product, a tooltip "Please select an item in the list." will be displayed			
			8-04	Inside the Add New Product module, check if the Unit Price field is empty	If the user clicks Save Product, a tooltip "Please fill out this field." will be displayed			
			8-05	Inside the Adjust Stock module, check if the Quantity field is empty	If the user clicks Save Adjustment, a label "Enter a quantity above zero." will be displayed			
			8-06	Inside the Assign Barcodes module, check if the barcode field is empty	If the user clicks Save, a label "Enter a barcode first" will be displayed			
			8-07	Inside the Import Products from CSV module, click Import Products without choosing a file	A label "No valid products to import" will be displayed			
	9 Format Check							
			9-01	Inside the Add New Product module, check if the user tries to enter letters in the Unit Price field	The user will not be able to type letters in the Unit Price field			
			9-02	Inside the Add New Product module, check if the user tries to enter letters in the Stock Quantity field	The user will not be able to type letters in the Stock Quantity field			
			9-03	Inside the Add New Product module, upload a file that is not an image	A label "Please choose an image file" will be displayed			
			9-04	Inside the Import Products from CSV module, choose a CSV without the sku or name column	A label "Missing required columns: sku, name" will be displayed			
			9-05	Inside the Import Products from CSV module, choose a CSV with a header row only	A label "CSV must have a header row and at least one data row" will be displayed			
	10 Range Check							
			10-01	Inside the Add New Product module, enter a negative value in the Stock Quantity field	A tooltip "Value must be greater than or equal to 0." will be displayed			
			10-02	Inside the Add New Product module, enter a negative value in the Reorder Level field	A tooltip "Value must be greater than or equal to 0." will be displayed			
			10-03	Inside the Adjust Stock module, enter 0 or a negative value in the Quantity field	A label "Enter a quantity above zero." will be displayed			
			10-04	Inside the Adjust Stock module, choose a Remove stock option and enter a quantity larger than the stock on hand	A label "Only (n) in stock: you cannot remove (qty)." will be displayed and nothing is saved			
	11 Consistency Check							
			11-01	Check if the Total products, Restock needed, Expiring soon, Total inventory value and Over max level information is correct	Each summary card will display the correct count/value based on the product records			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			11-02	Check if the Restock needed summary card works when clicked	Only the products at or below their reorder level (low stock and out of stock) will be shown			
			11-03	Click the status chips (All, Low Stock, Out of Stock, Expiring Soon, Expired, Healthy)	Only the products with the selected status will be shown, with the count on each chip			
			11-04	Check if the search bar works when searching by name, SKU or barcode	Only the records that match the search entry will be displayed			
			11-05	Click the All Categories drop-down menu and select a category	Only products under the selected category will be shown			
			11-06	Click the All Species drop-down menu and select Dog, Cat, Bird or Fish	Only products for the selected species will be shown			
			11-07	Click the Sort drop-down menu (Name, Price, Stock, Expiry, Status)	The products will be arranged according to the selected sort order			
			11-08	Check if the Card view / Table view buttons work when clicked	The products will be displayed as cards or as a table			
			11-09	In Table view, click a column header (Product, Category, Price, Stock, Expiration, Status)	The table will be sorted by that column; clicking again reverses the order			
			11-10	Click Add, fill in all required fields and click Save Product	A message "Product added" will be displayed and the product is saved in the inventory			
			11-11	Inside the Add New Product module, check if the Generate barcode button works when clicked	An in-store barcode will be generated in the Barcode field			
			11-12	Inside the Add New Product module, check if the Upload image button works when clicked	The file manager will open, and the chosen image is shown as a preview with "Image ready — save the product to keep it"			
			11-13	Click a product, then check if the Product Details window works	The product details (SKU, price, stock, supplier, batch, expiry, etc.) will be displayed			
			11-14	Inside the Product Details window, click Edit, change a detail and click Save Product	A message "Product updated" will be displayed and the record is updated			
			11-15	Inside the Product Details window, click Delete	A confirmation "Delete (product)? It leaves Inventory, the till and the reorder lists. Its past sales stay in the reports." will appear, with a line saying how many are still in stock if there are any; on Yes, Delete a message "Product deleted" is displayed and the product is removed			
			11-16	Click Stock on a product, choose "Add stock (received, found, returned)", enter the quantity and click Save Adjustment	A message "Stock adjusted — Recorded +(qty). Stock is now (n)." will be displayed and the stock increases by the quantity			
			11-17	Inside the Adjust Stock module, choose "Remove stock (taken out)", "Remove stock: count was lower than the system" or "Remove stock: damaged or spoiled" and save	A message "Stock adjusted — Recorded −(qty). Stock is now (n)." will be displayed and the stock decreases by the quantity			
			11-18	Check if the Reorder button works when clicked	A list of low-stock products will appear; after selecting and confirming, purchase orders are created and emailed to each assigned supplier			
			11-19	Tick product checkboxes, then check if Bulk Reorder works when clicked	A confirmation and final check will appear; purchase orders are created for the selected products			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			11-20	Tick product checkboxes, then check if Adjust Stock (bulk) works when clicked	A confirmation "Adjust stock by (qty) for (n) product(s)?" will appear; stock of all selected products is updated			
			11-21	Tick product checkboxes, then check if Delete (bulk) works when clicked	A confirmation "Delete (n) products? They leave Inventory, the till and the reorder lists. Their past sales stay in the reports." will appear; on Yes, Delete All the selected products are removed			
			11-22	Tick product checkboxes, then check if the Clear button works when clicked	All selected checkboxes will be cleared			
			11-23	Click Import, then check if Download Template works when clicked	The user will be directed to the file manager to save the CSV template file			
			11-24	Inside the Import Products from CSV module, choose a valid CSV and click Import Products	A preview will display, then a message "Import complete — Created (n) product(s)" is displayed and the products are added			
			11-25	Check if the Barcodes button works when clicked	The Assign Barcodes window will open where a barcode can be saved per product			
			11-26	Check if the Images button works when clicked	The Product Images window will open where an image can be saved per product			
			11-27	Inside the Adjust Stock module, type a quantity	The line "Stock will go from (n) to (m)." is displayed under the quantity before saving			
			11-28	Double-click Save Product, or double-click Save Adjustment	The button shows "Saving…" and only one product, or one stock change, is saved			
			11-29	Type % or _ in the search bar	Only products that contain that character are shown; if there are none, "No products match your filters" is displayed			
	12 Database Check							
			12-01	Click Add, then check if the user enters a SKU that already exists	A label "Error: A product with this SKU already exists" will be displayed			
			12-02	Inside the Assign Barcodes module, enter a barcode already used by another product	A label "Could not save (barcode may already be used)" will be displayed			
			12-03	Click Reorder when no product is below its reorder level	A label "No products need reordering" will be displayed			
			12-04	Sign in as a Viewer, then check if Add / Edit / Delete / Adjust Stock works	A label "Your role can't add products." (or edit/delete/adjust) will be displayed; inventory is read- only			
			12-05	Click Add, then enter a Product Name that another product already has	A question "This name is already in use — A product named "(name)" is already in Inventory (SKU (sku))… Save this one under the same name anyway?" will appear; Cancel keeps the form open, and "Yes, save it" saves the product			
			12-06	Click Add, then enter a Unit Price larger than 99,999,999.99	A label "Unit price is too large (99,999,999.99 at most)." will be displayed			
POINT OF SALE (STAFF)								
	13 Completeness Check							

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			13-01	On the first sign-in of the day, check if the Starting cash field is empty	If the user clicks Save starting cash, a label "Enter the cash in the drawer, or 0 if it is empty" will be displayed			
			13-02	Check if the cart is empty when Charge is clicked	A label "Cart is empty" will be displayed			
			13-03	Add items to the cart, check if the Cash received field is empty	If the user clicks Charge, a label "Enter the cash amount received" will be displayed			
			13-04	Inside the cash in / out window, check if the Amount field is empty	If the user clicks Record cash taken out / Record cash put in, a label "Enter the amount" will be displayed			
			13-05	Inside the cash in / out window, choose Taken out and leave the reason empty or too short	A label "Say who took the cash and what for" will be displayed			
			13-06	Inside the cash in / out window, choose Put in and leave the reason empty or too short	A label "Say who put the cash in and why" will be displayed			
			13-07	Click End of day, then check if the Cash counted in the drawer field is empty	If the user clicks Save count, a label "Enter the cash counted in the drawer" will be displayed			
			13-08	Inside My sales today, click Ask for void, check if the reason is empty or too short	A label "Say briefly what went wrong" will be displayed			
	14 Format Check							
			14-01	Check if the user scans/types a barcode that does not exist	A label 'No product found for "(barcode)"' will be displayed			
			14-02	Check if the user tries to enter letters in the Cash received field	The user will not be able to type letters in the Cash received field			
			14-03	Check if the user tries to enter letters in the Discount (%) field	The user will not be able to type letters in the Discount field			
	15 Range Check							
			15-01	Check if the Cash received is less than the total	If the user clicks Charge, a label "Insufficient cash — customer gave less than the total" will be displayed			
			15-02	Check if the user enters a discount above the allowed limit	A label "The largest discount allowed is (limit)%" will be displayed and the discount is capped			
			15-03	Check if the user increases the cart quantity beyond the available stock	A label "Only (n) in stock" / "Not enough stock" will be displayed			
			15-04	Check if the user clicks an expired product	A label "(product) has expired and cannot be sold" will be displayed			
			15-05	Inside the cash in / out window, enter 0 or a negative amount	A label "Enter the amount" will be displayed			
			15-06	Check if the user clicks a product with zero stock	A label "(product) is sold out" will be displayed			
	16 Consistency Check							
			16-01	Enter the starting cash and click Save starting cash	A label "Starting cash saved: ₱(amount)" will be displayed			
			16-02	Check if the category buttons work when clicked	Only the products under the selected category will be shown			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			16-03	Check if the search bar works when searching for a product	Only the records that match the search entry will be displayed			
			16-04	Press F2 and scan a product barcode	The scan field is focused and the scanned product is added to the cart			
			16-05	Check if clicking a product card works	The product is added to the Current Sale with a label "(product) added to cart"			
			16-06	Inside the cart, check if the + / − quantity buttons work when clicked	The quantity and the line total will be updated			
			16-07	Inside the cart, check if the Remove (x) button works when clicked	The item will be removed with a label "(product) removed"			
			16-08	Check if the Clear button works when clicked	All items will be removed with a label "Cart cleared"			
			16-09	Enter a discount (%), check if the subtotal, discount and total are correct	The discount amount and total will be recomputed automatically			
			16-10	Check if the quick cash buttons (Exact, +20, +50, +100, +500, +1000) work when clicked	The Cash received amount is filled/added and the change is computed automatically			
			16-11	Check if the Charge button works when clicked with enough cash	A "Confirm Cash Sale" summary will appear; on confirm a label "Sale completed! Change: ₱(amount)" is displayed, stock is deducted and a receipt is shown			
			16-12	Check if the Print receipt works after a sale	The receipt will be printed (thermal printer or print dialog)			
			16-13	Check if the Connect Printer button works when clicked	The browser asks for a USB printer; a label "Thermal printer connected — receipts now print directly" will be displayed			
			16-14	Check if the "My sales today" button works when clicked	A list of the cashier's own sales for today will be displayed with Reprint and Ask for void buttons			
			16-15	Inside My sales today, check if the Reprint button works when clicked	The receipt of that sale will be printed again			
			16-16	Inside My sales today, click Ask for void and enter a reason	A label "Sent to a manager" will be displayed and the request appears in Reports > Void requests			
			16-17	Check if the End of day button works when clicked	The End of day cash count window shows the starting cash, cash sales and expected cash			
			16-18	Inside End of day, enter the cash counted and click Save count	The Over / Short / Balanced amount is shown and the count is saved after confirmation			
			16-19	Check if the till header shows the cashier and date	The header above the cart will display "Cashier: (name) · (day)"			
			16-20	Check if the cash in / out button works when clicked	The cash in and out window will open with today's movements, or "No cash has been put in or taken out today."			
			16-21	Inside the cash in / out window, choose Taken out	The reason label changes to "Who took it, and what for" and the button to "Record cash taken out"			
			16-22	Inside the cash in / out window, choose Put in	The reason label changes to "Who put it in, and why" and the button to "Record cash put in"			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			16-23	Enter the amount and reason, then click Record cash taken out / Record cash put in	A confirmation "Record cash taken out?" / "Record cash put in?" will appear; on Record it, a label "Recorded" is displayed and the movement is listed with its amount (− or +)			
			16-24	Inside the cash in / out window, check if the totals are correct	The totals line will display "Put in ₱(amount) · Taken out ₱(amount)"			
			16-25	Inside End of day, check if the expected cash includes cash put in and taken out	The expected cash will equal starting cash + cash sales + cash put in − cash taken out			
	17 Database Check							
			17-01	Inside End of day, try to save the count again after it was already recorded today	A label "Today's count is already recorded. Ask a manager if it needs to be done again." will be displayed			
			17-02	Try to change the starting cash after today's count is recorded	A label "Today's cash count is already recorded, so the starting cash can no longer be changed." will be displayed			
			17-03	Inside My sales today, ask to void a sale that already has a void request	A label "A void has already been requested for that sale." will be displayed			
			17-04	After today's count is saved, click a product card	A label "Your drawer is closed for today" will be displayed and nothing is added to the cart			
			17-05	After today's count is saved, check the Charge button	The Charge button will be disabled with the tooltip "Today's count is saved. An administrator or a manager can reopen it."			
			17-06	After today's count is saved, open the cash in / out window	A label "Today's cash count is already recorded, so nothing more can be added for today." will be displayed and the form is hidden			
			17-07	Sign in as Staff, then check if other back-office pages can be opened	The Staff account can only open the Point of Sale and Settings; other pages redirect back to the POS			
			17-08	Click Charge, then click the confirm button twice quickly	Only one sale is recorded in My sales today and the stock is deducted once			
SALES HISTORY								
	18 Completeness Check							
			18-01	Click Filter without selecting a From or To date	A label "Select a date range" will be displayed			
			18-02	Click Void on a sale, then check if the reason field is empty	A label "A reason is required to void a sale" will be displayed			
			18-03	Click End of Day, then check if the Cash counted in drawer field is empty	If the user clicks Save Count, a message "Invalid amount — Enter the cash amount actually counted in the drawer." will be displayed			
	19 Consistency Check							
			19-01	Check if the Total Sales Amount, Total Transactions and Today's Sales information is correct	Each summary card will display the correct totals (voided sales excluded)			
			19-02	Check if the search bar works when searching for a sale	Only the records that match the search entry will be displayed			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			19-03	Select a From and To date and click Filter	All records will be displayed inside the table based on the selected date range			
			19-04	Check if the Clear button works when clicked	The date filter is removed and all sales are displayed			
			19-05	Check if the View button of a sale works when clicked	The Sale Details window will display the items, totals, cashier and payment			
			19-06	Inside Sale Details, check if the Print Receipt button works when clicked	The print preview of the receipt will be displayed			
			19-07	Click Void on a sale and enter a reason	A message "Sale voided — The sale was marked voided and its stock has been restored." will be displayed and the status changes to Voided			
			19-08	Sign in as Administrator. Inside Sale Details, check if Delete sale works when clicked	A confirmation "This removes the sale from the records for good… The Activity log keeps a copy of it. To cancel a sale and keep it on record, use Void instead. Delete it?" will appear; on Yes, Delete "Sale deleted" is displayed			
			19-09	Check if the Export CSV button works when clicked	The user will be directed to the file manager to save the CSV file, and a label "Sales exported successfully"			
			19-10	Check if the End of Day button works when clicked	The End of day cash count (whole shop) window shows the expected cash for the business date			
			19-11	Inside End of Day, enter the cash counted and click Save Count	A message "Day closed" with Balanced / Over by / Short by (amount) will be displayed			
			19-12	Inside End of Day, choose a date with cash put in or taken out at the till	The panel "Cash in and out of the drawers: ₱(amount) put in, ₱(amount) taken out" will list each movement with its reason, time, cashier and amount			
			19-13	Inside End of Day, check if the transactions line is correct	The line will display the number of cash sales and "sales ₱(amount) + ₱(amount) put in − ₱(amount) taken out"			
			19-14	Inside End of Day history, check if Reopen works on a recorded count	A confirmation "Reopen this count?" will appear; on confirm a label "Count removed. It can be recorded again." is displayed			
			19-15	Inside Sale Details, check the Status row	The status of the sale (Completed or Voided) will be displayed			
	20 Database Check							
			20-01	Click Export CSV when there are no sales in the list	A label "No sales to export" will be displayed			
			20-02	Check if a voided sale can be voided again	A label "Sale is already voided" will be displayed			
			20-03	Sign in as a Viewer, then check if Void / Delete Sale works	A label "Your role can't void sales." will be displayed; the Delete sale button is not shown			
			20-04	Select a From date later than the To date and click Filter	A label "The start date is after the end date" will be displayed			
			20-05	Sign in as a Manager, open Sale Details, then check Delete sale	The Delete sale button is not shown; only an Administrator can delete a sale			
SUPPLIERS								

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
	21 Completeness Check							
			21-01	Click Add Supplier, then check if the Supplier Name field is empty	If the user clicks Save Supplier, a tooltip "Please fill out this field." will be displayed			
			21-02	Inside the Add New Supplier module, check if the Contact Person field is empty	If the user clicks Save Supplier, a tooltip "Please fill out this field." will be displayed			
			21-03	Inside the Add New Supplier module, check if the Email field is empty	If the user clicks Save Supplier, a tooltip "Please fill out this field." will be displayed			
			21-04	Inside the Add New Supplier module, check if the Phone field is empty	If the user clicks Save Supplier, a tooltip "Please fill out this field." will be displayed			
			21-05	Inside Orders on the way, open Notes and send an empty note	A label "Write a note first." will be displayed			
	22 Format Check							
			22-01	Inside the Add New Supplier module, check if the Email field is incorrect (no @)	A tooltip "Please include an '@' in the email address." will be displayed			
			22-02	Inside the Add New Supplier module, enter a phone number with letters or with fewer than 7 digits	A label "Enter the phone number in digits (at least 7)." will be displayed			
	23 Consistency Check							
			23-01	Check if the Total Suppliers and Active Suppliers information is correct	Each summary card will display the correct count of suppliers			
			23-02	Check if the search bar works when searching for a supplier	Only the records that match the search entry will be displayed			
			23-03	Click Add Supplier, fill in all required fields and click Save Supplier	A message "Supplier added — The new supplier is ready for purchase orders." will be displayed and the record is saved			
			23-04	Click Edit on a supplier, change a detail and click Save Supplier	A message "Supplier updated" will be displayed and the record is updated			
			23-05	Click Delete on a supplier	A confirmation "Delete (supplier)? This cannot be undone." will appear, with the number of products and orders it would leave behind; on Yes, Delete "Supplier deleted" is displayed			
			23-06	Check if the Performance button works when clicked	The Performance window will display Fulfillment Rate, Avg Lead Time, Orders Received, Total Orders and the Purchase Order History			
			23-07	Check if the Emails button / supplier email address works when clicked	The Email History window will display every email sent with its read receipt (✓ delivered, ✓✓ opened)			
			23-08	Check if the Orders view (beside the search box) works when clicked	The Orders on the way, Offered by suppliers, Price changes to decide and Delivered, not yet paid sections will be displayed			
			23-09	Inside the Orders view, check if the Refresh button works when clicked	The lists are reloaded with a label "Orders refreshed"			
			23-10	Inside Orders on the way, check if Mark confirmed / Mark shipped works when clicked	A confirmation will appear; on confirm the order moves to Confirmed / On its way			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			23-11	Inside Orders on the way, check if Receive into stock works when clicked	A confirmation of the quantities received will appear; the order is marked Received and the product stock increases			
			23-12	Inside Orders on the way, check if Cancel order works when clicked	A confirmation "(PO) will be marked cancelled. This cannot be undone." will appear; the order is cancelled			
			23-13	Inside Offered by suppliers, check if Accept offer / Decline works when clicked	The offer becomes a confirmed order, or is marked cancelled			
			23-14	Inside Price changes to decide, check if Accept / Decline works when clicked	A label "Price updated in inventory." or "Proposal declined. The price is unchanged." will be displayed			
			23-15	Inside Delivered, not yet paid, check if Mark as paid works when clicked	A confirmation will appear and a label "Marked as paid." will be displayed			
			23-16	Inside Orders on the way, check if Notes works when clicked	The message thread with the supplier will open and a new note can be posted			
	24 Database Check							
			24-01	Email a purchase order to a supplier with no email address on file	A message "This supplier has no email address on file" will be displayed			
			24-02	Check if a purchase order that is not yet received can be marked paid	A label "Only a received order can be marked paid." will be displayed			
			24-03	Sign in as a Viewer, then check the supplier list	The Edit and Delete buttons will not be shown; the list is read-only			
			24-04	Click Add Supplier, then enter a Supplier Name that already exists	A label "A supplier with this name is already on the list." will be displayed and the supplier is not added twice			
REPORTS — SALES								
	25 Completeness Check							
			25-01	Click Custom, then Apply without choosing a From or To date	A label "Choose both a start and an end date" will be displayed			
	26 Range Check							
			26-01	Click Custom, then check if the From date is later than the To date	A label "The start date is after the end date" will be displayed			
	27 Consistency Check							
			27-01	Check if the period buttons (Last 7 days, Last 30 days, This month, All time) work when clicked	All figures, charts and tables will be updated for the selected period			
			27-02	Click Custom, choose a From and To date and click Apply	All records will be displayed based on the selected date range			
			27-03	Check if the Day / Week / Month buttons work when clicked	The revenue chart and breakdown table will be grouped by day, week or month			
			27-04	Check if the Revenue, Sales made, Average per sale and Items sold information is correct	Each figure will display the correct totals for the selected period			
			27-05	Check if the Best-selling products and Sales by category charts are correct	The charts will display the top products and the revenue per category for the period; the lines under the category chart add up to Revenue			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			27-06	Inside Reports, check if the Export CSV button works when clicked	The user will be directed to the file manager to save the CSV file, and a label "Sales report exported"			
			27-07	Choose All time, then check the lines under the Sales by category chart	The lines "Items sold, all categories", "Sales recorded without items", "Discounts given" and "Revenue" will be displayed, and they add up to Revenue			
	28 Database Check							
			28-01	Click Export CSV for a period with no sales	A label "There is nothing to export for this period" will be displayed			
REPORTS — STOCK PLANNING (PREDICTIVE ANALYTICS)								
	29 Consistency Check							
			29-01	Click the Stock planning tab	The forecast for the next 30 days will be displayed, using Random Forest and Gradient Boosting, which learn from the last four months of sales			
			29-02	Check if the Expected to sell, Expected revenue, Products to reorder and Forecast accuracy information is correct	Each figure will display the forecast totals and the model's measured accuracy			
			29-03	Check if the "What to reorder" table is correct	Each product to reorder will show the reason, stock on hand, on order, order-by date and suggested order quantity			
			29-04	Inside What to reorder, check if the Export list button works when clicked	The user will be directed to the file manager to save the CSV file, and a label "Reorder list exported"			
			29-05	Inside What to reorder, check if Create purchase orders works when clicked	A confirmation will appear; on confirm a message "Purchase orders created" is displayed and each supplier is emailed			
			29-06	Check if the "Too much stock" table is correct	The overstocked products, quantity more than needed and money tied up will be displayed			
			29-07	Check if the "Likely to expire before it sells" table is correct	Products likely to expire with leftover quantity and value at cost will be displayed			
			29-08	Inside All products, check if the search bar works when searching for a product	Only the records that match the search entry will be displayed			
			29-09	Inside All products, click the filters (All, Selling fast, Selling steadily, Selling slowly, Not selling)	Only products with the selected sales speed will be shown with the count per filter			
			29-10	Inside All products, click a product	The product detail will display its sales history and 30- day forecast chart			
			29-11	Inside the product detail, check if the Close button works when clicked	The product detail will close			
			29-12	Check if the Busiest days of the week and Sales by month charts are correct	The charts will display sales per weekday and per month			
			29-13	Check if the Expected sales by category and by brand charts are correct	The charts will display the forecast per category and per brand			
			29-14	Check if the "How good is the forecast" table is correct	The accuracy of each forecasting method will be displayed			
			29-15	Check if the Refresh button works when clicked	The forecast and all stock planning figures will be recalculated			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			29-16	Check the line under the Stock planning heading	It will display how many days of sales are on record, how many days the model reads, and "Not counted: May 10, 2026 to May 31, 2026 (22 days: sales were recorded without their items)."			
			29-17	Inside All products, click a product with fewer than 14 days of sales on record (a newly added product)	The product detail will say "This product has only (n) days of sales on record, so this is a cautious first estimate…"			
			29-18	Open "How these numbers are worked out"	The explanation of each figure will be displayed, including the section "What the forecast cannot know"			
			29-19	Inside "How good is the forecast", check the line under the table	It will display "Today's forecast is then corrected by half of the miss in this test, category by category: …" with a factor for each category			
	30 Database Check							
			30-01	Click Export list when no product needs reordering	A label "Nothing needs reordering right now" will be displayed			
			30-02	Click Create purchase orders when no listed product can be ordered	A label "Nothing on the list can be ordered right now" will be displayed			
REPORTS — VOID REQUESTS & ACTIVITY LOG								
	31 Consistency Check							
			31-01	Click the Void requests tab	The sales a cashier asked to void will be displayed with the cashier's reason and amount; the tab shows the pending count			
			31-02	Inside Waiting for a decision, check if Void sale works when clicked	A confirmation will appear; a label "Sale voided and its items returned to stock" will be displayed			
			31-03	Inside Waiting for a decision, check if Keep sale works when clicked	A confirmation will appear; a label "Request dismissed. The sale stands." will be displayed			
			31-04	Inside Void requests, check if the Refresh button works when clicked	The list is reloaded with a label "Void requests refreshed"			
			31-05	Check if the "Voided in the last 90 days" list is correct	All voided sales with cashier, date, reason and amount will be displayed			
			31-06	Click the Activity log tab (Administrator)	The log of who did what and when will be displayed			
			31-07	Inside Activity log, click the All actions drop-down (Created, Updated, Deleted, Signed in)	Only the records with the selected action will be shown			
			31-08	Inside Activity log, click the All areas drop-down (Products, Sales, Suppliers, Purchase orders, Users)	Only the records in the selected area will be shown			
			31-09	Inside Activity log, check if the Refresh button works when clicked	The activity log will be reloaded			
NOTIFICATIONS								
	32 Consistency Check							
			32-01	Check if the low stock, stock out and expiring product alerts are generated	A notification will appear for each product that is low, out of stock or near expiry			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			32-02	Click the All Types drop-down (Low Stock, Stock Out, Expiration, Overstock, Reorder, Information)	Only notifications of the selected type will be shown			
			32-03	Click the All Status drop-down (Unread, Read)	Only notifications with the selected status will be shown			
			32-04	Click a notification	The notification will be marked as read and the unread badge decreases			
			32-05	Check if the Mark all read button works when clicked (Administrator or Manager)	A label "All notifications marked as read" will be displayed			
			32-06	Check if the Clear read button works when clicked (Administrator or Manager)	A confirmation will appear; on confirm a message "Notifications cleared" is displayed			
			32-07	Check if the Refresh button works when clicked	The notification list will be reloaded			
			32-08	Sign in as a Viewer, then open the Notifications page	The Mark all read and Clear read buttons are not shown, and the notices cannot be changed			
USERS (ADMINISTRATOR)								
	33 Completeness Check							
			33-01	Click Add User, then check if the Full Name field is empty	If the user clicks Create User, a tooltip "Please fill out this field." will be displayed			
			33-02	Inside the Add New User module, check if the Username field is empty	If the user clicks Create User, a tooltip "Please fill out this field." will be displayed			
			33-03	Inside the Add New User module, click Send code while the Email field is empty	A message "Email required — Type the new user's email address first, then send the code." will be displayed			
			33-04	Inside the Add New User module, check if the Email verification code is empty	A message "Code required — Enter the 6-digit code that was emailed to (email)." will be displayed			
			33-05	Inside the Add New User module, check if the Password field is empty	A message "Password required — Set a password for the new account before saving." will be displayed			
			33-06	Inside the Add New User module, choose role Supplier without choosing a supplier	A message "Supplier required — Choose which supplier this account belongs to." will be displayed			
	34 Format Check							
			34-01	Inside the Add New User module, check if the Email field is incorrect (no @)	A tooltip "Please include an '@' in the email address." will be displayed			
			34-02	Inside the Add New User module, enter a password with fewer than 6 characters	A message "Password too weak — Must be at least 6 characters." will be displayed			
			34-03	Inside the Add New User module, enter a password without an uppercase letter	A message "Password too weak — Add at least one uppercase letter (A–Z)." will be displayed			
			34-04	Inside the Add New User module, enter a password without a number	A message "Password too weak — Add at least one number (0–9)." will be displayed			
			34-05	Inside the Add New User module, enter a password without a special character	A message "Password too weak — Add at least one special character (e.g. !@#$%)." will be displayed			
			34-06	Inside the Add New User module, enter a wrong verification code	A label "That code is not correct. (n) attempt(s) left." will be displayed			

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			34-07	Inside the Add New User module, change the email after the code was sent	A message "Email changed — The email address changed after the code was sent. Send a new code to this address." will be displayed			
	35 Consistency Check							
			35-01	Check if the search bar works when searching for a user	Only the records that match the search entry will be displayed			
			35-02	Check if the "Show deactivated" toggle works when clicked	Deactivated accounts will be shown in the list with a Restore button			
			35-03	Inside the Add New User module, enter an email and click Send code	A label "Code sent to (email)" will be displayed and a 6- digit code is emailed			
			35-04	Inside the Add New User module, fill in all fields with the correct code and click Create User	A message "User created" will be displayed and the user is added to the table			
			35-05	Inside the Add New User module, check the Role drop- down (Staff, Manager, Administrator, Viewer, Supplier)	The selected role is saved; the Supplier field appears only when Supplier is chosen			
			35-06	Click Edit on a user, change details and click Update User	The user details/role will be updated and saved			
			35-07	Click Deactivate on a user	A confirmation "Deactivate (name) (username)? They can no longer sign in…" will appear; on Yes, deactivate "Account deactivated" is displayed and the user can no longer sign in			
			35-08	With Show deactivated ticked, click Restore on a deactivated user	A confirmation will appear and a message "Account restored" will be displayed			
			35-09	Click Resend on an unconfirmed user	A message "Confirmation link sent" will be displayed			
			35-10	Inside Password reset requests, click "Approve and email link"	A label "Approved. A reset link was emailed to (name); it works for 1 hour." will be displayed			
			35-11	Inside Password reset requests, click Decline	A label "Declined. (name)'s password stays as it is." will be displayed			
			35-12	Check your own row in the Users table	No Deactivate button is shown for your own account			
	36 Database Check							
			36-01	Inside the Add New User module, check if the Username already exists	A message "Username already taken" will be displayed			
			36-02	Inside the Add New User module, check if the Email Address already exists	A label "That email address is already used by (username)." will be displayed			
			36-03	Inside the Add New User module, enter a code that has already expired	A label "That code has expired. Send a new one." will be displayed			
	37 Range Check							
			37-01	Inside the Add New User module, enter a wrong code 5 times	A label "Too many incorrect attempts. Send a new code." will be displayed			
SETTINGS								
	38 Completeness Check							

MODULE	NO.	TEST CASE	ID	DESCRIPTION	EXPECTED RESULT	ACTUAL RESULT	STATUS	COMMENT
			38-01	Inside the Profile tab, check if the Full Name field is empty	If the user clicks Save Changes, a label "Please enter your full name" will be displayed			
			38-02	Inside the Password tab, check if the Current Password field is empty	If the user clicks Update Password, a label "Enter current password" will be displayed			
			38-03	Inside the Password tab, check if the New Password field is empty	A label "Enter new password" will be displayed			
			38-04	Inside the Password tab, check if the Confirm New Password field is empty	A label "Confirm new password" will be displayed

	47 Database Check							
			47-01	Inside Products you supply, propose the same price as the current one	A label "That is already the current price." will be displayed			
			47-02	Inside Open orders, confirm an order that is no longer pending	A label "Only an order waiting for confirmation can be confirmed." will be displayed			

Changes in this copy

This copy matches the system after the update of 11 October 2026. It has 332 test cases: 22 rows were reworded and 20 cases were added. Everything else is as in the plan it was made from.

Reworded, because the system says or does something different: 3-04, 8-05, 10-03, 11-01, 11-02, 11-15, 11-16, 11-17, 11-21, 19-08, 20-03, 23-05, 27-05, 29-01, 32-05, 32-06, 35-07, 41-06, 13-08, 16-14, 16-16, 17-03.

Added, for behaviour the earlier plan did not test: 7-15, 10-04, 11-27, 11-28, 11-29, 12-05, 12-06, 17-08, 19-15, 20-04, 20-05, 22-02, 24-04, 27-07, 29-16, 29-17, 29-18, 29-19, 32-08, 35-12.

Cases that need something set up first: an expired product and a sold-out product that have barcodes (the till shows their message when they are scanned), a product with fewer than 14 days of sales, a voided sale, a supplier offer and price proposal from a supplier login, a Manager account, a Viewer account, and (for printing and scanning) the USB receipt printer and barcode scanner.
