How to use this script

Follow the steps from top to bottom: each step starts where the one before ended, from signing in to logging out. Every happy case (numbered 1.1, 1.2 …) is followed by its sad cases (1.1a, 1.1b …). For a sad case the expected result gives the Problem first (the exact message the system shows) and then the Solution (what the user does to fix it).

Words in brackets, such as (product) or (amount), stand for the value on the screen. A tooltip is the small box the web browser shows beside a field that must be filled in; its wording comes from the browser.

Mark STATUS with the colours in the legend: green Passed, red Failed, amber In Progress, blank Open.

Set up before testing

- A supplier account linked to a supplier in Suppliers.
- Orders from the shop to that supplier: one waiting for confirmation and one already confirmed.
- At least one product that this supplier supplies, with a current price.
- For the 5-offers case: 5 offers from this supplier still waiting for the shop.
