How to use this script

Follow the steps from top to bottom: each step starts where the one before ended, from signing in to logging out. Every happy case (numbered 1.1, 1.2 …) is followed by its sad cases (1.1a, 1.1b …). For a sad case the expected result gives the Problem first (the exact message the system shows) and then the Solution (what the user does to fix it).

Words in brackets, such as (product) or (amount), stand for the value on the screen. A tooltip is the small box the web browser shows beside a field that must be filled in; its wording comes from the browser.

Mark STATUS with the colours in the legend: green Passed, red Failed, amber In Progress, blank Open.

Set up before testing

- An administrator account.
- A product with 20 in stock, and a second product (for the duplicate SKU and name cases).
- A supplier with orders received in the last 12 months, a supplier whose orders all arrived late, and a supplier with no order received in that time.
- A purchase order waiting in the Orders view, a few sales, and another user account to deactivate.
- An email inbox you can open, for the 6-digit code when adding a user.
